

Corrigendum

Corrigendum to “Detailed kinetic modeling of dimethoxymethane. Part I: *Ab initio* thermochemistry and kinetics predictions for key reactions” [Combust. Flame (189) 433–442]

Wassja A. Kopp^a, Leif C. Kröger^a, Malte Döntgen^{a,b}, Sascha Jacobs^c, Ultan Burke^c, Henry J. Curran^d, Karl Alexander Heufer^c, Kai Leonhard^{a,b,*}

^c Physico-Chemical Fundamentals of Combustion, RWTH Aachen University, Aachen 52062, Germany

^d Combustion Chemistry Centre, Ryan Institute, School of Chemistry, National University of Ireland, Galway, Ireland

This corrigendum corrects an error in Table 4 of the originally published article. The A-factors (in the upper half of Table 4) have to be divided by Avogadro's number.

The corrected table reads:

Table 1

Corrected upper half of Table 4 of Combust. Flame 189, p. 440.

Pressure (atm)	A (cm ³ /(mol s)) RH + CH ₃ → R3 + CH ₄	n (-)	E_a (cal/mol)	$T_{\min} - T_{\max}$
0.01	1.720×10^{10}	0.522	10714.3	500K - 2000K
0.10	6.028×10^8	1.025	10403.4	500K - 2000K
1.00	7.653×10^6	1.649	9869.7	500K - 2000K
10.0	4.977×10^4	2.338	9092.5	500K - 2000K
100.0	7.572×10^2	2.893	8333.4	500K - 2000K
